

# RITRANSPARENCY REPORT 2020

# Pareto Asset Management AS

### About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <a href="PRI website">PRI website</a>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

#### PRI disclaimer

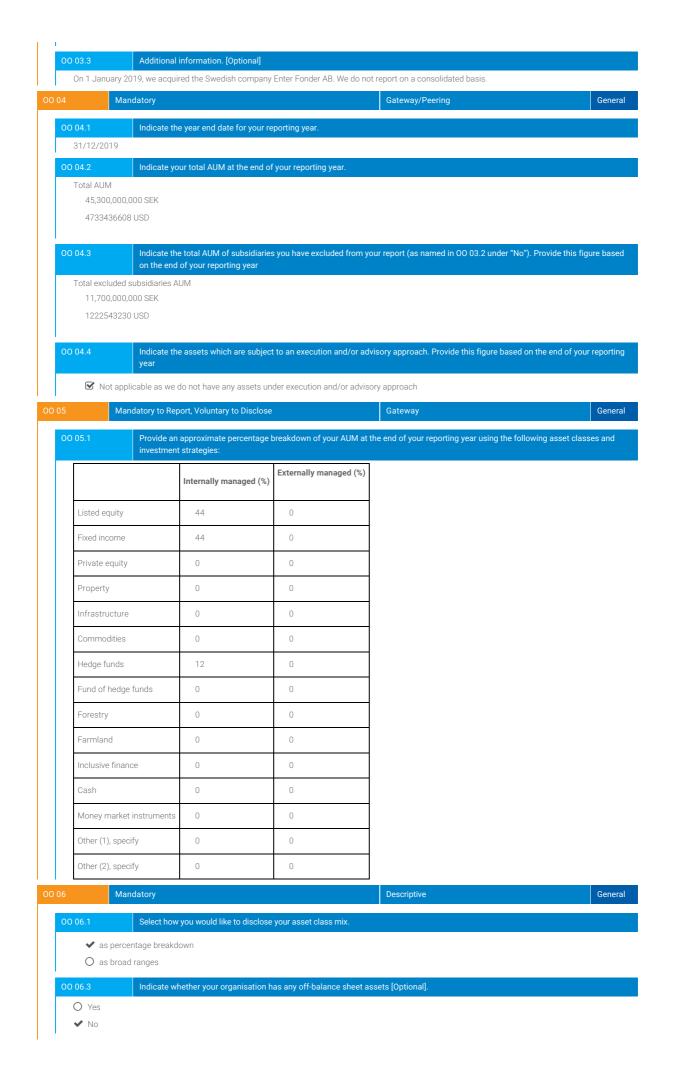

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

# Usage restrictions

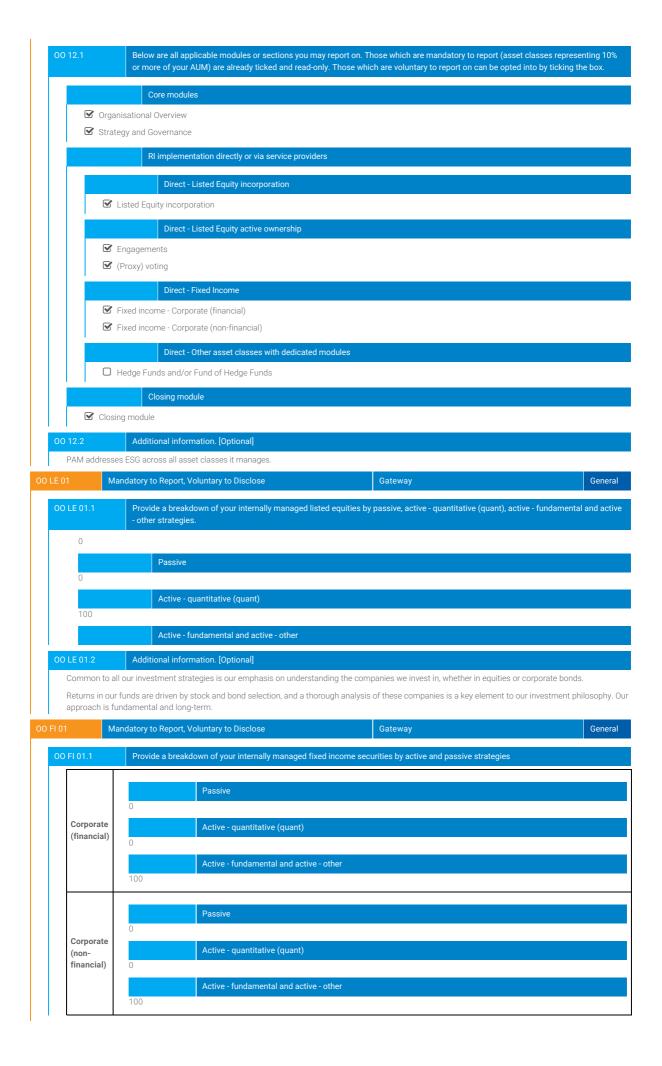

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

OO FI 01.2 Additional information. [Optional]

Common to all our investment strategies is our emphasis on understanding the companies we invest in, whether it is in equities or corporate bonds

Returns in our funds are driven by stock and bond selection, and a thorough analysis of these companies is a key element to our investment philosophy. Our approach is fundamental and long-term.

When we buy bonds, we rely on a thorough analysis of the issuer's financial situation, the value of any collateral and the various clauses in the loan agreement. This way we form a view of the risks as weighed against the risk premium the underlying bond is assumed to provide. This risk premium is the main source of return for funds with corporate bonds. We are not concerned with tactical dispositions or bets on the yield curve.

As one of the larger and more experienced investors in the Nordic high-yield bond market, we are able to negotiate favourable terms on bonds we invest in through the primary market. These processes also help the issuers to set more appropriate and market-based bond structures.

- \* active management
- \* company focus
- \* a fundamental approach
- \* a long-term perspective
- \* concentrated portfolios
- \* we seek to invest in companies that have good quality operations and management, and a focus on ethics in both thought and action.

The latter point is facilitated by having concentrated portfolios with long holding periods; we get to know very well the companies we invest in.

## Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Pareto Asset Management AS (PAM) works systematically with ethical considerations in the management of funds and discretionary mandates. PAM shall not make investments which constitute an unacceptable risk of investments contributing to unethical acts or omissions. Such contributions could reduce sustainability and long-term value creation.

In September 2014, PAM decided to formalise our commitment to social responsible investments by committing to the UN PRI (United Nations Principles for Responsible Investment). The principles were signed in November 2014 and PAM presented its first PRI report in March.

In 2016, PAM decided to further formalise its commitment by becoming a member of Norsif. Due to our strong presence in Sweden through a branch in Stockholm, it was logical for us to also join the Swedish sister organisation Swesif. In April 2018, our chief investment officer became a member of the Norsif board.

Due to our fundamental investment philosophy and a limited number of investments, it is our ambition to provide solid and transparent documentation of our portfolio management being in compliance with our guidelines for responsible investments.

#### General considerations

Our guidelines for responsible investments are founded on the guidelines used by the Norwegian Government Pension Fund, the United Nations Principles for Responsible Investments (PRI), as well as recognised principles and standards.

The current guidelines also state that precautionary measures shall be taken when investing in bio-technology, weapons, alcohol and gambling, meaning that ethical issues should be subjected to careful considerations before an investment can be made. This may also apply to other ethical issues.

In more general terms, environmental, social and governance issues, as well as technological changes, may affect how PAM views bans or additional precautionary measures when investing in other sectors than those explicitly being addressed by our current guidelines.

#### Negative screening

Our sustainability considerations roughly imply a process with two basic steps. First, we screen all investments on specific criteria. Second, companies subject to red flags in screening are put under scrutiny.

In our screening we have made a distinction between unethical/unsustainable products or production processes and companies with unethical/unsustainable conduct or behaviour.

In the first case, the question is whether the actual properties of the product or manufacturing process are negative. The company may exercise proper social responsibility, but the behaviour is still irrelevant if the product or manufacturing process warrants exclusion due to ethical considerations. In the second case it is the companies' conduct, and not necessarily the products, that are negative.

The company also keeps a record of high risk companies.

#### The investment process

Each management team is responsible for the thorough assessment of ESG criteria before an investment is made. Likewise, they have a responsibility for ongoing monitoring so that they maintain preparedness for any ESG issues that are not necessarily visible or actualised when the investment is made. In the event of doubt, the case will be presented to the ethics committee.

Our approach to responsible investments covers all asset classes, and there are no exceptions to our policy.

		Asset Ma	gement conducts regular meetings with the management, board members, shareholders etc. of portfolio companies, this dialogue is the
			rument we use in our work as an active owner. As an active owner we address environmental, social and governance factors in our our portfolio companies. This kind of engagement activity is usually limited to our holdings in the Norwegian market, in which we hold
	substan	itial owne	hip interests. In addition, though, we do raise a number of ESG issues with investor relations contacts at global companies - or higher
			f possible.
			in the Norwegian market, we often have senior management from our portfolio companies at our internal investment staff meetings. The the meeting is presenting the company, but these meetings provide an excellent opportunity for engagement and dialogue in the event
	any issu	ies are pi	eent or on the rise.
		Mon	Core Assessed DRI 1.2.2

Type of engagement	Reason for interaction
Individual / Internal staff engagemer	<ul> <li>✓ To influence corporate practice (or identify the need to influence it) on ESG issues</li> <li>✓ To encourage improved/increased ESG disclosure</li> <li>✓ To gain an understanding of ESG strategy and/or management</li> <li>☐ We do not engage via internal staff</li> </ul>
Collaborative engagements	<ul> <li>✓ To influence corporate practice (or identify the need to influence it) on ESG issues</li> <li>✓ To encourage improved/increased ESG disclosure</li> <li>□ To gain an understanding of ESG strategy and/or management</li> <li>□ We do not engage via collaborative engagements</li> </ul>
Service provider engagements	<ul> <li>□ To influence corporate practice (or identify the need to influence it) on ESG issues</li> <li>□ To encourage improved/increased ESG disclosure</li> <li>□ To gain an understanding of ESG strategy and/or management</li> <li>☑ We do not engage via service providers</li> </ul>

#### LEA 02.4 Additional information, [Optional

We have no general policy of engaging via collaborative engagements and we take it that Norsif/Swesif membership is not what's intended her. However, we do from time to time, as we have done recently, team up with other investors in order to bring about change or better disclosure on certain topics, the last such case involving a conflict of interest due to related party transactions. Some six cases of collaborative efforts have involved corporate governance.

We would like to add that due to our concentrated portfolios and the long-term nature of our holdings, we know the companies we invest in very well, communicating regularly with senior management, whether on a formal or an informal basis. This is not always logged, but it is a central part of our portfolio management, as we argue that knowing our portfolio companies well is a means of reducing risk beyond simple diversification. Dialogue is more common in our management of domestic securities, but we do encourage all portfolio managers to engage in dialogue with their respective portfolio companies.

					Collaborative engagements	
				<b>☑</b> Potent	ial to enhance knowledge of ESG issues through other investors

LEA 18.3	In cases where your organisation voted against management recent engaged.	ommendations, indicate the percentage of companies whic	ch you have

Votes would never be cast without preceding discussions with the portfolio managers, so there is no need to communicate our votes to them. We don't track these votes in terms of percentages, so the above percentages are rough approximations. In cases where we vote against management recommendations, we may nevertheless cast votes in favor of, say, approving the accounts.

	0	No incorporation strategies applied		

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

The strategy has evolved over the years. Being a Norwegian company, Pareto Asset Management found that the Norwegian Government Pension Fund was a natural starting point for the incorporation of our RI/ESG strategy, which we have applied for more than 10 years.

The last few years we have had a more active approach to RI/ESG incorporation, where we also look at other sources of information as well as emerging trends and issues. For å fundamentally oriented active manager - also in fixed income - integration is part of the game.

As for the Nordic Ecolabeling, we have committed ourselves to a comprehensive and thorough ESG incorporation process for the fund for which we have gained approval. We are working to get a similiar kind of approval for another FI fund.
